PRECISION CUTTING & DOWEL DRILLING

MORSØ - F PLUS TEN

Miter Machine

Foot-operated

- ▼ Dust free operation
- ▼ No compressor needed
- ▼ Exact 45° degree cut
- ▼ No electricity

MORSØ F PLUS TEN cuts double miter at 45° and single miter up to 90°. Tenon, mortise joints and a wide variety of angled cuts can also be made.

Cuts hard wood, soft wood, plastic and MDF.

The latest machine in the MORSØ range is the manually operated MORSØ F PLUS TEN, which works after the same principles as the MORSØ F. The difference is that the height of the working table has been raised by 100 mm (4").

Very important:

The working height of the foot pedal is still the same, compared to the standard Morsø F. Especially for taller people the change of height makes the MORSØ F PLUS TEN extremely more convenient and ergonomic to work with. Operators working the machines more than 1 hour a day need the best possible working conditions and this has now been achieved with the extra height.
